DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/571,320, filed on May 15, 2000.

Specification

The abstract of the disclosure is objected to because of the recitation "The present invention...". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Calamito et al.

Calamito et al. discloses an integrally woven multi-apertured multi-layer angle (3-D, 5 axial) interlock fabric. The fabric 10 has a plurality of apertures 12 formed within the thickness and extending across the width of the fabric (divisibly woven sections). Figures 1 and 2 clearly show a structure used as a solid structural member from a 3-D woven fabric with apertures 12 which represent the "divisibly woven" sections as recited by the instant invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Homma teaches a reinforcing fabric with divisible sections, Mohammed teaches 3-D fabrics with varied cross sections, Kimbara teaches multi-axes 3-D fabrics, and Yoshida teaches 3-D woven fabrics.
